Documentary with State, Central Inter-Governmental

Declaration with Scientific Methodology approach

Why Deeply concerned ?

The role of PSUs in connection with waste to Wealth

Abstract meaning speaks too technical and constructive statement for understanding

Objective gist of our upcoming projects it may not add the value of technology shall not be defined

Paper: speaks with objectives, abstract, aim, and preamble with systematic obtained result

presentation. Method of approach and it's outcomes in detail manner

fundamental things in the object are abstract

Documentary is nothing but a paper

Documentation is the action of blue print

Declaration: identification of problems with a systematic obtained accepted approach for resolution and solving the problems with constituent (policies, articles, acts) manner. Final reports to support the community and allows the member states to implement within the rules and regulations

Now the presentation

Presentation

Abstract: The main system of approach in talking about the beneath earth and it's out comes.

While talking about the development the elements of beneath earth plays vital role in the globe. The points to be considered at the time of utilisation of the resources is what a question.

While answering this question one has to act /address the problems with an intellectual manner, if not everything shall may not get right direction for resource utilisation.

Introduction: team of thought leaders gave a big thought to serve the community from the nature given elements of five issues which are to encounter problems in utilisation of five elements resources.

Such as atmosphere, land and hill scape, sea scape, beneath earth and space. Each element is to discussed in length in the interest of the globe. But here wish to talk the beneath earth as one of main element

Scientific and systematic Approach:

The identification of the selected zone or area that how one can recognise the do's and don'ts on the particular subject. Whether the correct promotional activity is taken up or not for the educational systematic way. Then execution connect the right approach

The following points shall be established within framework United Nations with scientific research

1. Problems identification in the utilisation of resources
2. Analysing the problems and mitigation with scientific approach
3. Methods developments and Implementations at the identified zones
- 4 . Analysis of outcomes of results obtained in the implementation

Summary: Total work to be presented with a conclusion
